

Our Mission

The Charter School Institute is a statewide charter school authorizer. CSI seeks to foster high-quality public school choices that serve all students.

What We Believe

Every child should have access to high-quality public school choices. We foster diverse school options that are high-performing and accessible to all.

Our approach to authorizing charter schools balances autonomy and accountability. We offer schools the flexibility to choose their educational models and methods. We hold schools accountable to clear expectations for academic, financial, and organizational performance.

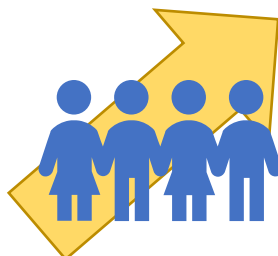

Our Schools

CSI oversees 40+ charter schools that serve 20,000+ students. CSI schools offer 16 unique educational models, including project based, Early College, and Montessori.

Our Students

CSI schools serve a diverse student body. CSI continues to increase service to students with special needs.

Our Outcomes

CSI holds schools accountable for performance. Three out of four CSI schools earned Performance or Distinction ratings.
