

CSI Overview

Our Mission

The Colorado Charter School Institute is a statewide charter school authorizer. CSI seeks to foster high-quality public school choices that serve all students.

Who We Serve

CSI schools are tuition-free and open to all students. CSI students are comparable to the state averages for students of color, multilingual learners, and students with a 504 plan.

CSI holds its schools accountable for academic, financial, and operational performance. Importantly, nearly 3 out of 4 CSI schools earned the state's highest academic rating.

Who We Are

Every child should have access to high-quality public school choices. We foster diverse school options that are high-performing and accessible to all.

Our approach to authorizing charter schools balances autonomy and accountability. We offer schools the flexibility to choose their educational models and methods. We hold schools accountable to clear expectations for academic, financial, and organizational performance.
